County COVID-19 Statistics

San Mateo County COVID-19 Data Dashboard

Case data up to and including July 13, 2020

Total Cases

4168

Cases by Sex

Total Cases by Day

Total Deaths

114

Deaths by Sex

Cases by Age Group

Cases by Race/Ethnicity

New Cases by Day

Deaths by Age Group

Deaths by Race/Ethnicity

Because of limited testing capacity, the number of cases detected through testing represents only a small portion of the total number of likely cases in the County. COVID-19 data are reported as timely, accurately, and completely as we have available. Data are updated as we receive information that is more complete and will change over time as we learn more. Cases are lab-confirmed COVID-19 cases reported to San Mateo County Public Health by providers, commercial laboratories, and academic laboratories, including reporting results through the California Reportable Disease Information Exchange. A lab-confirmed case is defined as detection of SARS-CoV-2 RNA in a clinical specimen using a molecular amplification detection test. Cases are counted by date the lab result was reported. Death data last updated July 13, 2020.

Shelter in Place Order

California Resilience Roadmap

covid19.ca.gov

7/13/2020

“Governor Newsom’s measures further emphasize the need for all of us to do our part in stopping the spread of COVID-19,”

said Dr. Scott Morrow, San Mateo County Health Officer.

“That means wearing a face covering, maintaining social distancing, and limiting our activities. It’s up to us to determine our future.”
